

Growing Global Demand for Food

- Rising world population is consistently and steadily increasing demand for agricultural crops while simultaneously decreasing the amount of arable land available for crop production.¹
- Much of the suitable land not yet in use is concentrated in a few countries in Latin America and sub-Saharan Africa, but many countries with growing rural populations in these regions are extremely land-scarce, and much of the potential land is suitable for growing only a few crops that are not necessarily those for which there is the highest demand.²
- "Population growth and urbanization are significant factors driving overall growth in demand for agricultural products,... Additionally, growth in global income outpaces population growth, further boosting and changing agricultural demand."¹
- Low- and middle-income countries are projected to be the main driver of agricultural trade growth. Food consumption and feed use are particularly responsive to income growth in developing countries, and per capita meat consumption is projected to rise rapidly. Agricultural product demand in developing countries is further reinforced by population growth rates accounting for greater than four-fifths of demand through 2026.¹
- "Expansion of livestock production in feed-deficit countries continues to be the principal driver of growth in coarse grain trade, particularly in Africa, the Middle East, Latin America, and Southeast Asia."¹

Risks and Disclosure

- *Commodities and futures generally are volatile, and instruments whose underlying investments include commodities and futures are not suitable for all investors.*
- *This material must be preceded or accompanied by a prospectus. Please read the prospectus carefully before investing or sending money. To obtain a current prospectus visit the links below:*

“Global trade in soybeans and soybean products has risen rapidly since the early 1990s, and has surpassed global trade in both wheat and total coarse grains (corn, barley, sorghum, rye, oats, millet, and mixed grains).”¹

The Teucrium Funds provide investors unleveraged direct exposure to commodities without the need for a futures account. Teucrium is an issuer of four single-commodity-focused agricultural Exchange Traded Products (“ETP”) and one Fund-of-Funds with a core-agriculture focus. Teucrium designs investment vehicles that offer both liquidity and transparency in single-agricultural commodity investing to a range of investors and hedgers in the ETP format. With its substantial experience in commodity futures trading, the Teucrium team has the ability to deliver ETPs in an equity format for investing without the use of

leverage. The Teucrium family of commodity Funds are all traded on the NYSE Arca.

The Teucrium Funds are commodity pools that issue Shares that may be purchased and sold on the NYSE Arca. The Funds are series of the Teucrium Commodity Trust (“Trust”), a Delaware statutory trust. Additional series of the Trust that will be separate commodity pools may be created in the future. The Trust and the Fund operate pursuant to the Trust’s Second Amended and restated Declaration of Trust and Trust Agreement (the “Trust Agreement”). The Funds were

- Shares of the Funds are not insured by the Federal Deposit Insurance Corporation (“FDIC”), may lose value, and have no bank guarantee.
- Unlike mutual funds, the Funds generally will not distribute dividends to its shareholders. Investors may choose to use the Funds as a means of investing indirectly in commodities, and there are risks involved in such investments.
- Prior to the launch of the Teucrium Corn Fund, Teucrium Trading, LLC had never operated a commodity pool. Investors may choose to use the Funds as vehicles to hedge against the risk of loss, and there are risks involved in such hedging activities.
- This material is not an offer or solicitation of any kind to buy or sell any securities outside of the United States of America.

formed and are managed and controlled by the Sponsor, Teucrium Trading, LLC. The Sponsor, a limited liability company formed in Delaware, is registered as a commodity pool operator (“CPO”) and a commodity trade advisor (“CTA”) with the Commodities Futures Trading Commission (“CFTC”) and is a member of the NFA.
